

Tell me about yourself

"My name is Riya Dominic, and I'm currently pursuing my MCA after completing BCA. I have a strong interest in web development and have been learning frameworks like Spring Boot and React. I'm also exploring how AI can be integrated into web apps. Alongside academics, I enjoy painting and playing badminton, which help me stay creative and balanced. My goal is to contribute to meaningful projects while constantly growing my skills."

Why are your marks low?

"While my academic scores might not fully reflect my capabilities, I've worked hard to build strong technical and problem-solving skills. For instance, I developed a full-stack web application for palliative care using Spring Boot and React, which involved real-world collaboration and learning beyond the classroom."

Why do you want to work here?

"Your company's focus on innovation and technology aligns with my passion for learning and contributing to impactful digital solutions. I admire your projects in the web and AI space and would love to be a part of a team where I can learn and grow."

What are your strengths?

"My biggest strengths are my adaptability, continuous learning mindset, and problem-solving ability. I'm quick to grasp new technologies and enjoy working on practical applications of what I learn."

What is your biggest weakness and how do you manage it?

"My biggest weakness is that I sometimes hesitate to ask for help because I try to solve everything on my own. While being independent is good, I've realized that seeking guidance early can save time and lead to better solutions. Now, I remind myself that collaboration is part of growth, and I try to reach out more openly when needed—especially in team projects or when facing a blocker."

Why should we hire you?**Alternate Answer (based on your interests):**

"You should hire me because I bring a creative and analytical mindset to every project I work on. My background in web development, along with my growing interest in integrating AI into web applications, allows me to think both technically and innovatively. Outside of academics, my hobbies like painting help me approach UI/UX with a strong visual sense,

and playing badminton has taught me discipline and focus. I'm excited to contribute fresh ideas, continuously learn, and collaborate with a passionate team like yours."

Tell me about a challenge you have faced and how you dealt with it

"During college, I was an active member of the Coding Club, and we had taken up a team project to build a web-based application. At the same time, I had to work on my mini project, which was also quite demanding in terms of coding and deadlines.

Managing both was a real challenge because each required time, planning, and focus. I handled it by creating a proper schedule, breaking my tasks into smaller goals, and setting daily targets. I also communicated clearly with both teams and made sure to avoid overlaps in responsibilities.

In the end, both projects were completed successfully and even appreciated by faculty. That experience taught me how to manage time under pressure, prioritize tasks, and stay committed to multiple responsibilities without compromising quality."

What are your salary expectations?

"As a fresher, I'm looking for an opportunity to learn and grow. I'm open to a fair compensation that reflects the responsibilities of the role."

What motivates you?

"I'm motivated by the opportunity to create things that solve real problems. The satisfaction of seeing something I built working live gives me energy to learn and push further."

- **How do you prioritize your work?**

"I list down all tasks, mark them based on urgency and importance, and use tools like calendars or to-do lists to stay on track."

- **Describe your ideal work environment**

"An environment that's collaborative, growth-oriented, and open to new ideas where feedback is constructive and learning is continuous."

- **Tell me about a time you showed leadership**

"During a group assignment, we were falling behind schedule. I organized a team meeting, reassigned tasks based on strengths, and we managed to complete it on time."

- **How do you handle criticism?**

"I take it positively. I believe feedback helps me grow, and I always reflect on it to see where I can improve."
